

**FieldSpec®
HandHeld 2™**

The FieldSpec HandHeld 2 spectroradiometer is the latest in compact remote sensing technology from ASD inc. That simplifies data collection in scientific and industrial applications.

Features of HandHeld 2 Systems:

Wavelength range	325-1075 nm
Spectral resolution	<3nm at 700 nm
Internal memory	2,000 spectra
LCD screen	rear mounted 2.7" color
GPS	Available option receiver
Operation Wavelength accuracy	±1 nm translates to precision results
targeting accuracy	Built-in laser pointer
Power	AA batteries provide 2.5 hours
Packaging	Airline approved size, ultra rugged, waterproof, wheeled Pelican case
